

Assignment – APM (Marketing & WhatsApp Module) - Bento Labs

Context :

PropFlo manages multiple real estate projects under one company-level WhatsApp Business account (WABA).

You need to design scalable WhatsApp automation for:

- New enquiries
- Existing leads
- Multi-project handling

Part 1 – Design the WhatsApp Flow :

Create a clear step-by-step flow covering:

- New lead identification & CRM creation
- Existing lead recognition (mobile match)
- Project selection logic (multi-project builder)
- Agent routing logic
- Human handover
- 24-hour window + template usage logic
- Edge cases

Note : Keep it practical and API-aware.

Part 2 – Product Roadmap:

Create a quarterly roadmap for PropFlo's WhatsApp module based on evolving WhatsApp API capabilities:

Based on Meta whatsapp API roadmap, how our roadmap should look like.

- Q1: Core automation + flows
- Q2: Analytics + AI tagging
- Q4: AI conversational layer

Evaluation Criteria :

We will evaluate:

- Structured thinking
- API understanding
- AI-native mindset
- Multi-project scalability
- Clarity & speed of execution

Submission: Max 5–6 pages. Clear logic preferred over long explanations.

Note : Open to use any of the AI tools and need to share or present the chat along with the assignment and during the interview (if qualified).
