PROFESSIONAL SUMMARY:

Technical Product Manager with **3.5+ years** of experience across **enterprise fintech platforms** and **0→1 consumer products**. Experienced in **product discovery**, **PRDs**, **roadmap planning**, **backlog prioritization**, and **cross-functional execution** with engineering teams. Strong technical foundation in **Java**, **APIs**, **system design**, and **analytics**, combined with hands-on experience building **AI-powered** and **marketplace products**.

SKILLS:

Product : Product Discovery, PRDs, User Stories, Roadmapping, Feature Prioritization, Agile/Scrum, Stakeholder Management, GTM Strategy

Analytics: SQL, Funnel Analysis, Product Metrics, Cohort Analysis, KPI Tracking, Competitor Research

Technical: Java, Spring Boot, REST APIs, SQL, Postman, Swagger, JMeter, Prometheus, Grafana

Tools & AI: Jira, Confluence, Figma, Miro, Claude, Cursor, Lovable, n8n, Gamma, NotebookLM, Google Antigravity

EXPERIENCE:

Product Management Intern — Ardelis Technologies [Jan 2026– Present]

1. Baby Products Marketplace

- Conducted **product discovery** and mapped **buyer-seller journey flows** to identify **UX friction points**
- Prioritized **feature backlog** and translated requirements into **user stories** and **acceptance criteria**
- Improved usability through structured **bug triaging** and collaboration with developers
- Contributed to **GTM planning** focused on **marketplace liquidity** and early user acquisition

2. Christian Matrimony Platform

- Performed **competitor analysis** across matrimony platforms to identify product gaps and opportunities
- Created **PRDs** and feature requirement documents for new onboarding and matchmaking flows
- Structured backlog documentation to improve **engineering clarity** and **sprint execution**

Technical Product Owner — Payment Traffic Control Platform

Mphasis Ltd (Client: JPMorgan Chase) | Nov 2024 – Nov 2025

- Owned backend **product roadmap** for enterprise payment routing workflows used internally at **JPMorgan Chase**
- Converted business requirements into **PRDs**, **user stories**, and **sprint-ready backlog items**
- Reduced **UAT defects by 20%** through improved requirement clarity and acceptance criteria definition
- Improved **platform reliability by 15%** using **KPI monitoring**, **incident analysis**, and **operational improvements**
- Delivered **security modernization initiatives** improving **compliance posture by 30%**
- Collaborated with **engineering**, **QA**, and **stakeholders** across **Agile sprint cycles**

PROFESSIONAL EXPERIENCE:

Software Engineer — Mphasis Ltd (Client: JPMorgan Chase) Jun 2022 – Oct 2024

- Built and enhanced **REST APIs** using **Java**, **Spring Boot**, and **SQL** for enterprise financial platforms
- Improved **API validation efficiency by 40%** through optimized backend validation workflows
- Built monitoring dashboards using **Prometheus** and **Grafana** to improve **observability**
- Improved **system performance by 18%** through **JMeter-based performance analysis** and optimization
- Investigated **production incidents** using **SQL queries** and **log analysis** to improve platform reliability

PRODUCT WORK (Selected)

YouTube – “Search Inside Video” Feature ([Link](#))

- Designed **AI-powered transcript-based search experience** for navigating long-form videos
- Defined **North Star Metric**: Effective Segment Engagement
- Proposed **timestamp-based discovery flow** to reduce scrub friction and improve watch continuity

AI Travel Discovery Engine (Prototype) ([Demo](#))

- Built **AI-powered travel recommendation prototype** using **Claude Code** and **Google Antigravity**
- Designed **personalized destination discovery** and **itinerary generation experience**
- Integrated **AI-assisted UX flows** focused on travel exploration and planning

EDUCATION

B.Tech — Electrical & Electronics Engineering | SRM Institute of Science and Technology | CGPA: 8.11

AI-First Product Management Fellowship | Product Space | Jan 2026 – Present
